Ngabo, Francky F.xlsx;

Hello Mr Theo,

Like we just discussed it, I am complaining about the data minor result.

The problem is mainly on the part of the proftak where it seems like Mr.olaf had an impression that we did not do our supposed job, but as you know we did do our job which wasn't easy due to the **non-response** of the company even though we tried many times to contact the company.

Here by is the e-mail we send to the examboard due to the fact that Mr.olaf didn't want to change our grade.

We would like to complain about our Data Science minor results. First we were told by the teachers of the minor that we must have 'enough' (as a grade) in each subject in order to go to final assessment. However, we managed to achieve those grade which were told to us by each teacher on the feedback hours. We also had professional task in which we all were group members. For this particular task we did our best and our project tutor gave us a grade of 7.

*While we were feeling confident that we can pass, since the teachers approved our work, at the end it turned out that we do not pass the minor. For us, this means that we failed to earn knowledge and spend 6 months of our education for nothing, but we strongly disagree. We managed to finish the company project and each subject, as stated in the above paragraph, hence we feel confident that we gained knowledge for **at least** 6 for a final grade of the minor. However, we all received 5, while having all assignments done and graded as enough.*

The response of the examboard was that they can't do much about it due to the fact that it is not their jurisdiction(because it is a dutch Minor) however they did come up with an idea that, in my case to get a 50% of the all minor, because I received 5 as the total mark so 15 ecs, because as mentioned they couldn't interfere in the grading of the minor.

Mr. Olaf gave me a **5 only** because the proftak was not a success ,even though, as mentioned above, we all manage to pass the rest of the practical course as you can see it in the googlesheet published by Mr.Olaf and attached to these e-mail.

Please contact me or the rest of the group for more information.

Thank you.

Kind regards
Francky Ngabo
